## Collecting Inspection Chamber

Order No. 4211

Large-scale inspection chamber for extensive green roofs with openings for potential System Gutter insertion.

### Technical Data

#### Collecting Inspection Chamber

Large-scale inspection chamber, made of galvanized and plastic coated steel, for the installation above roof outlets (also above fixed gravel retainers). Special openings for the insertion of the System Gutters SR 75; detachable cover.

Height:	ca. 110 mm
Aperture:	ca. 500 x 500 mm
Flange:	ca. 700 x 700 mm
Colour:	anthracite
Weight:	ca. 7.0 kg

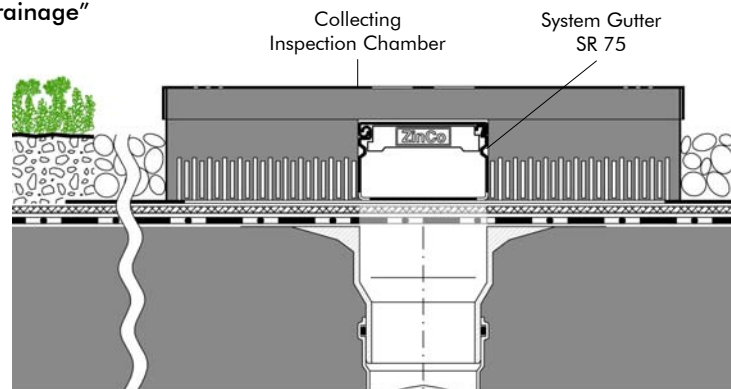

Slotted cross-section for drainage: ca. 3800 mm<sup>2</sup>

### Features

- usable above roof drains
- suitable for syphonic action drainage systems
- openings for up to four System Gutters SR 75
- lateral slots ensure additional drainage
- particularly suitable for single layer green roof build-ups
- protects from incidence of light and therefore prevents plant growth
- no safety strip required

### Application Example

#### "Roof drainage"

### Specification Suggestion

Collecting inspection chamber with openings for up to four potential System Gutters SR 75; galvanized and plastic coated steel, height ca. 110 mm, opening ca. 500 x 500 mm, detachable cover, with lateral slots, weight ca. 7 kg, flange size ca. 700 x 700 mm, delivery and

installation according to manufacturer's instructions.
